

ECP-01T/R

Single Port Ethernet over Coax Transmitter / Receiver

Dimension

Overview

ECP-01 Series are High-Speed, long distance Ethernet & PoE extender that makes possible to transmit the Ethernet signal and PoE up to 400m through coaxial cables in different situations.

It is cost-effective and time saving solution to migrate existing analog system to IP based system since ECP-01 series support easy installation utilizing the existing coaxial cable.

With long distance transmission feature, the device makes to overcome 100 meters distance limitation easily and reduces the construction cost significantly compared with fiber optic configuration.
