Overview

ECP-2701 is a High-Speed, long distance Ethernet & PoE extender that makes possible to transmit IP data up to 2.4Km and PoE up to 1.2Km through various analog cables in different situations.

It is cost-effective and time saving solution to migrate existing analog system to IP based system since ECP-2701 supports easy installation utilizing the existing CCTV cable (Coax, UTP, 2wire).

With long distance transmission feature, the device makes to overcome 100 meters distance limitation easily and reduces the construction cost significantly compared with fiber optic configuration.
