## Overview

ECP-2704R is a 4 port Ultra High-Speed, long distance Ethernet & PoE receiver that receives 4 different signals from different EoC devices and transmits IP data to network switch or NVR via RJ45 port.

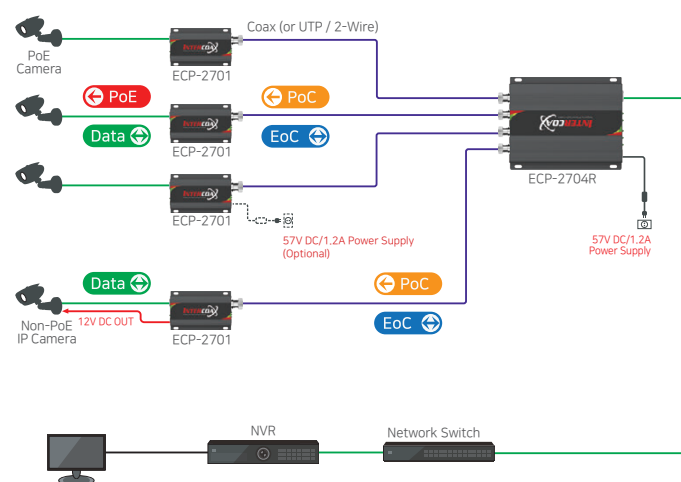

It is cost-effective and time saving solution to migrate existing analog system to IP based system since ECP-2704R supports easy installation utilizing the existing CCTV cable (Coax, UTP, 2wire).

With Smart Impedance Matching feature, the device maintains optimum signal level without any interference and Smart Over Current Protection (SOCP) feature makes the device to transmit power over coax safely.

## Features

- Ethernet over coax (UTP, 2-Wire) communication following IEEE1901 Standard
