Overview

The FLX-1008 is a receiver for the FLEXIA camera line. It is Intercoax's new short and long range Ethernet Switching Hub, with 8 RJ45 ports supporting PoE+ (IEEE802.3at) as downlink and 2 ports supporting RJ45 and SFP as uplinks. The downlink transmits at 10/100Mbps and automatically detects standard Ethernet as well as Long Reach Protocol. The uplink transmits at 100/1000 Mbps and supports both standard Ethernet and standard SFP Module.

Maximum transmission distance is 1km when connected to FLEXIA cameras supporting Long Reach Protocol, and 100m with standard Ethernet. Two power supplies are included for redundancy and power sharing (30W per port)

- When using 2 power supplies, PoE supports about 136W for all ports and max.30W per port (Ex: If 1 ~ 4 ports are used, 30W/port; if all 8 ports are used, 17W/port)
- When using 1 power supply, overall PoE is about 68W, and max.30W per port (Ex: If 1 ~ 2 ports are used, 30W/port; if all 8 ports are used, 8.5W/port)
